

# Customer Support

Professional Services for Every Phase  
of Your Range Test & Measurement Lifecycle

# Customer Support is Everything We Do

## The MI Technologies' Difference

At MI Technologies, customer support is a fundamental part of our solutions. It's the way we do business. For more than 50 years, MI Technologies has been a leading provider of RF and Microwave control, test and measurement solutions. That leadership position is based on a commitment to provide the highest-quality products and full lifecycle customer support in the industry.

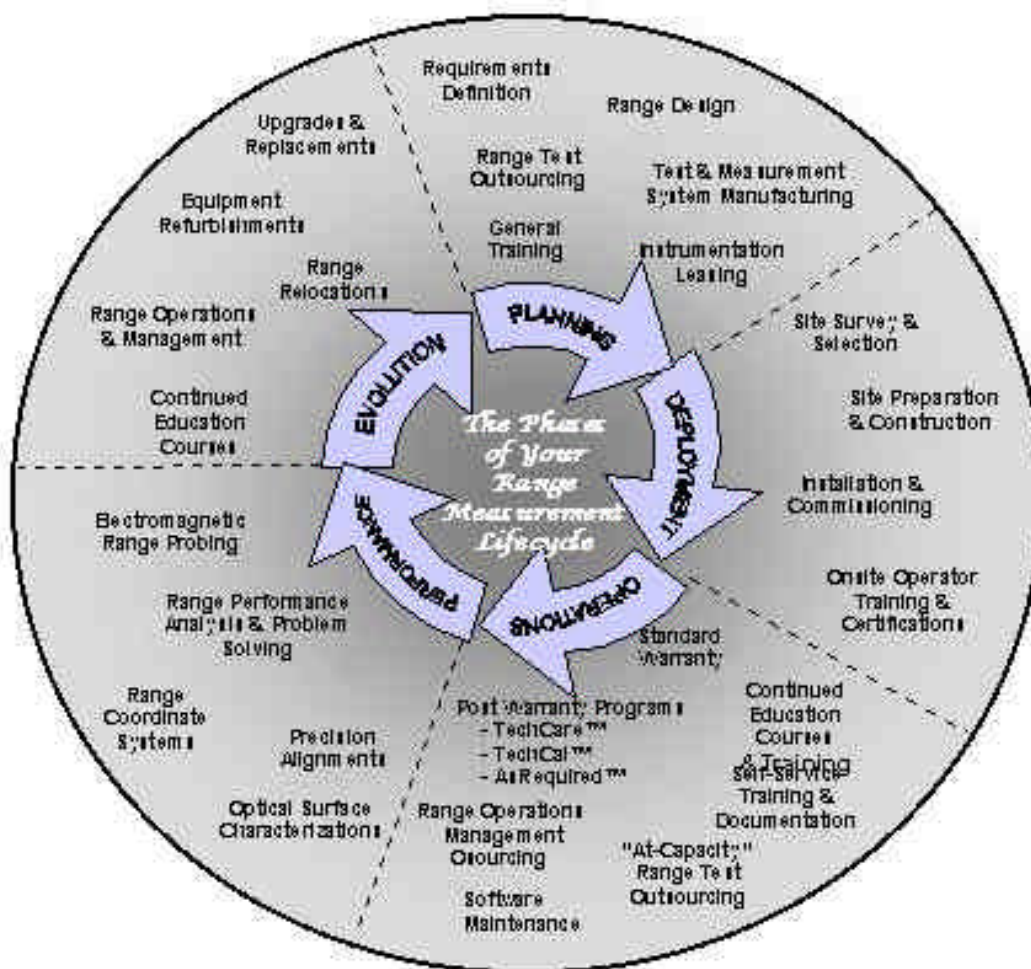

## Experienced. Skilled. Reliable.

Our commitment to customer support goes beyond the standard product warranties, maintenance and repair services. To us, customer support is everything we do for our customer. MI Technologies' lifecycle support is there for you every step of the way, from the time our sales professionals first meet with you to evaluate your test and measurement requirements, through the request for quotation, system design, manufacturing and installation at your site.

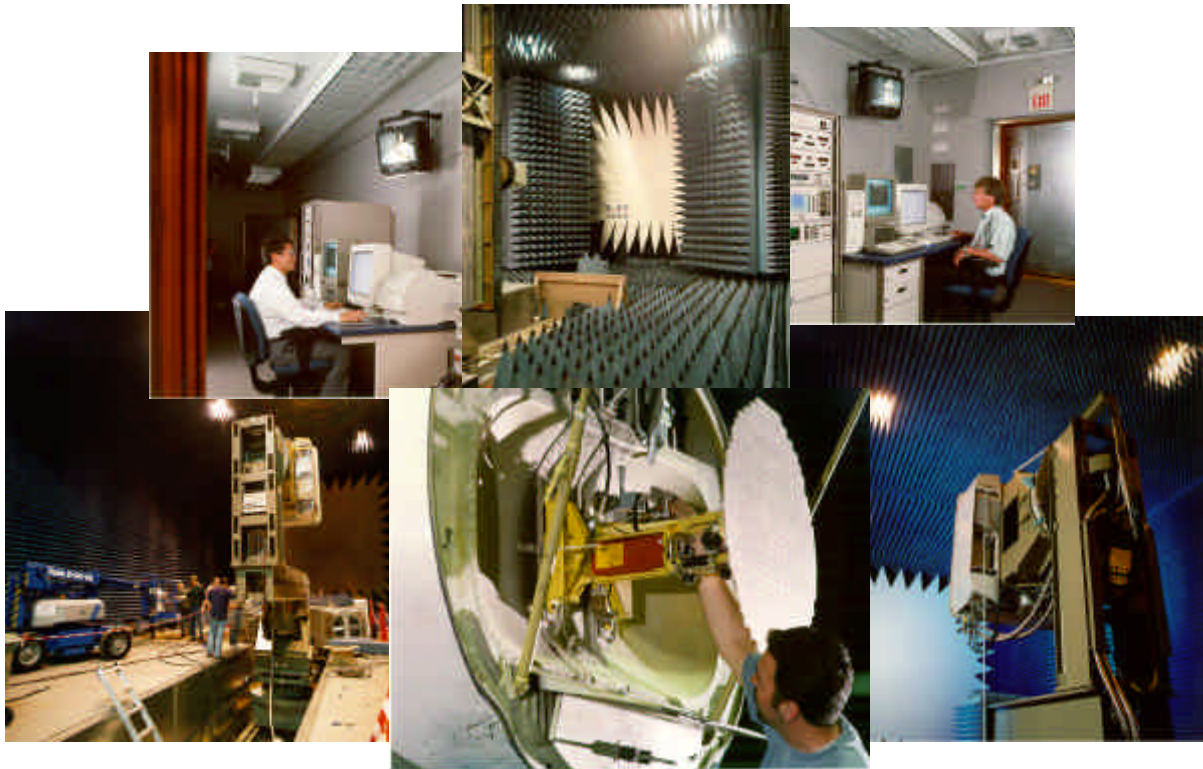

But our support doesn't end there. Our expert field support services help you meet ongoing needs, while our post-warranty programs and professional services meet your evolving test and measurement requirements.

## Global Reach, Local Care

MI Technologies offers the broadest and most responsive customer support organization in the industry. We have established a worldwide network of strategically located service centers, parts depots and factory-trained service professionals. We're equipped to provide rapid and responsive onsite service wherever and whenever you need it.

MI Technologies offers a comprehensive portfolio of integrated and flexible full-lifecycle services to meet your needs, including consulting, testing, design, training, installation, scheduled maintenance, repairs, spares, operations management, diagnostics, range relocations and refurbishments. We work with your test range and measurement organization to help you achieve an optimal balance between the best possible performance and lowest total cost of ownership over the measurement lifecycle.

## MI Technologies Family of Product Offerings

MI Technologies is a leading global supplier of RF and microwave test and measurement products, systems, software and services. Our commercial, military and government customers use MI Technologies' instruments and software products to provide fast and reliable data acquisition, measurement, monitoring and control. We provide solutions to meet a wide range of application needs, including wireless voice, data and video communications, navigation, direction finding, positioning, radar, tracking and stealth technology.
